

ABOUT US

PANTAFLIX Technologies develops and operates an end-to-end Online Video Platform. Our Services capture all parts of the value chain for film and video, from content licensing or self-publishing of premium film content via PantaflixPro, to distribution and consumption on all common mobile and Smart TV devices. With our established Video on Demand (VOD) platform Pantaflix (www.pantaflix.com) and other streaming services we offer fantastic entertainment to all of our users with a huge portfolio of national and international films, series, and TV shows. Built by filmmakers for film-lovers, we are growing rapidly and looking to find highly skilled and motivated people to join our international, passionate team.

OPPORTUNITY

We are looking for a Software Engineer to join our growing team in Berlin, Germany. As part of a team of engineers and Product Managers all around the globe you define the functionality and design of our next generation streaming platform and streaming services. You drive new feature development from inception, design, and testing to the final release, thereby addressing customer requirements and meeting business goals, and build software to meet and exceed our major customers' needs. Your responsibilities also include analyses of fault-tolerance and availability issues, performance and scale challenges as well as the provision of solutions to this end, ensuring operational readiness of the services, and meeting the commitments to our customers regarding reliability, availability, and performance.

YOUR SKILLS & EXPERIENCE

You're comfortable working with

- Pure JavaScript as well as NodeJS in combination with Express, React and TypeScript
- SQL and NoSQL databases (MySQL, Aurora, ElasticSearch)
- CI/CD tools and practices
- Distributed Systems and Micro-Service Architectures
- AWS cloud services

QUALIFICATION

- You are experienced in building sophisticated, reliable, and trustworthy software or services.
- You have excellent problem-solving skills, and strong CS fundamentals including data structures, algorithms, and distributed systems.
- You like to take end-to-end responsibility in your team, and you can identify with the "you build it you run it" approach.
- You have experience in development, design, use and operation of available cloud-based applications (AWS).
- You have an informed opinion, and you stand up for it – and you respect it when others do, too.
- You are not afraid to give open and appreciative feedback in order to maintain or increase the quality of your team.
- You are not afraid to communicate with us in English.
- You have experience in working in an agile environment.

BENEFITS

- Motivated and skilled team of film-lovers/tech-lovers/brand-builders
- Modern offices located in the center of Berlin
- Free drinks, fruits, snacks, get-together Fridays and regular team events

Ready to make a huge impact in our team?

Please send us your motivation letter with salary expectations and CV to join Pantaflix.
